Municipal Contact Information......Back Cover

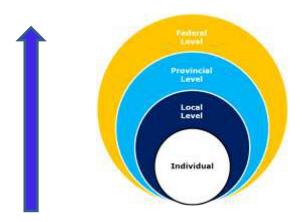

# Know the Risks, Reduce them Together!!!

EVERYONE has a role to play in being prepared for an emergency. Individuals and families should have an emergency kit with enough supplies for at least 72 hours. They are responsible for having a plan in place in the event they are required to evacuate their home - a plan that includes a safe place for all family members (including pets!) to go. They are responsible for knowing their hazards and ensuring their homes and cottages are prepared and protected.

Municipalities are required to have an emergency plan and program in place to respond to large scale emergencies. These programs include ensuring the public is aware of their hazards and has the information they need to prepare for them. During an emergency, available municipal resources will be directed to protect critical infrastructure (roads, water, hydro, etc.) and to response to those with immediate life safety issues.

The pages of this Emergency Preparedness Guide will assist individuals with fulfilling their responsibilities in an emergency. Remember - EMERGENCY PREPAREDNESS STARTS WITHYOU!

#### PROTECTING YOUR SAFETY BEGINS AT HOME

EMERGENCY MANAGEMENT IS A BOTTOM UP RESPONSIBILITY..... it starts with YOU!!

# **How You Can Plan for Emergencies**

## Be Prepared!

Make sure everyone in your family knows what to do before, during and after an emergency. As a family, make a plan and discuss how you can best prepare for the most likely hazards that will affect your home. If you live alone, make a plan for yourself and make sure you talk about it with your neighbours and friends. This Guide will provide you with information, lists and templates to use to make sure you are prepared for any emergency.

#### Make a Plan

Keep a list of emergency phone numbers handy. Put a copy of important phone numbers in your "Ready to Go" bag (Page 19). Select a friend or family member who lives a distance away from you to be the contact person in the event you are separated from your family. Make sure everyone in the family has this person's phone number - put a copy in purses, briefcases, school backpacks, etc or make sure it is stored in electronic devices such as iPods, cellphones or laptops. You can also include floor plans that include where exits and escape routes from each room. There is also a spot to include the location of your "Ready to Go" kit.

Don't forget your pets!! Make sure you have Pet Emergency Kit (pg 9) and have a list of pet friendly hotels, kennels, veterinarians or friends who can take your animal or who you can stay with if you need to evacuate your home.

# Prepare your Kit

Make sure you have supplies in your home to be self-sufficient for AT LEAST 72 hours. You should also prepare a "Ready to Go" (pg 19) kit that has all the supplies and information you will need if you have to evacuate quickly, a Pet Emergency Kit (pg 9) and a make sure your car has a Car Survival Kit (pg 8) in case you are stranded or need to travel a long distance.

# **Know your Hazards**

Make a list of all the hazards that may affect you and your home. Contact your local Community Emergency Management Coordinator for information on the top local hazards in your community. Find out how you can prevent, mitigate or prepare for these hazards to make sure your family can remain safe and calm during an emergency.

# 72-Hour Survival Kit

Fc	ood and Water
_	3-5 gallons of water (4 litres per adult, perday)
	Canned or freeze-dried foods
	One manual can opener
_	Instant drink and juices
	Water purifying tablets
_	vvator parnying tablote
W	armth and Shelter
	Tent/Trailer or other shelter
	Wool-blend blanket or sleeping bags
	Emergency reflective blanket
	Lightweight stove & fuel / camp stove (to be used OUTDOORS
	ONLY)
	Hand and body warm packs
	Hand and body warm packs Poncho (a large garbage bag can make a great rain poncho)
	ools and Equipment
	Pocket knife
	Flashlight, lantern or candles including windproof/ waterproof
	matches
	Shovel, hatchet or axe
	Sewing kit
	Nylon rope and duct tape Cooking utensils
	Cooking utensils
	Radio and batteries or crank radio
	First aid kit
	Pen/ pencil and writing pad
	Whistle to make noise with
	Hand sanitizer
1	Water resistant duffel had or tote to store everything in

# 72-Hour Survival Kit

# Special Items

Keep copies of important family records and documents in a waterproof and fireproof, portable container.

□ Heal	th ca	rds
--------	-------	-----

- □ Drivers' licences
- □ Birth certificates
- ☐ Bank account and credit card numbers
- ☐ A small amount of cash
- □ Photos of family members in case you are separated in an emergency
- □ Games and toys for children
- ☐ Extra keys for house and car(s)
- ☐ Cell phone, battery charger and car adaptor (keep battery charged!)

Don't put your life at risk by waiting and trying to gather items when the emergency requires you to leave your home immediately!

# **Car Survival Kit**

Shovel
Sand or kitty litter
Traction mats
Towchain
Compass
Cloth or roll of toilet paper
Warning light or road flares
Extra clothing and footwear
Emergency food pack
Booster cables
Ice scraper and brush
Matches and a "survival" candle in a deep can (to warm hands,
heat drink, or use as emergency light)
Fire extinguisher
Extra windshield washer fluid
Fuel-line antifreeze
Road maps
Flashlight
First-Aid kit
Blanket (special "survival" blankets are best)

# **Pet Emergency Survival Kit**

72-hour supply of food, bowls and can opener
72-hour supply of bottled water
Blankets/towels (more than one in case theyget soiled)
Small toy
Leash, muzzle, harness
Litter pan, litter, plastic bagsand scooper
Pet carrier for transportation
Medical records, especially proof of vaccinations (most boarding
facilities will not accept pets without proof of current vaccination
records)
Medications and pet first aid kit
Current photo of pet in case they getlost
Information on your pet's feeding schedule, behavioural/medical concerns and special boarding instructions
List of boarding facilities in your area, hotels/motels that accept
pets, and friends and relatives that you and your pet can stay with
(pets are generally not allowed inside emergency shelters
designated for people, with the exception of service animals such
as guide dogs)

I.D. tag (microchipping also recommended)

# **Prepare Your Kit**

Prepare your survival kits by putting a few items in it each month:

Flashlight, radio, duffel bag/tote

**JANUARY** 

Blankets, first aid kit, hand sanitizer

#### **FEBRUARY**

Cash, spare keys, important papers

#### March

Food & water, medication and utensils

APRIL

Camp stove, whistle, home emergency plan

MAY

Duct tape, matches, basic tools

#### JUNE

Toiletries, spare clothes, games

JULY

Pet Kit – picture, supplies, carrier

## August

Car Kit – Flashlight, first aid kit, blanket

#### SEPTEMBER

Car Kit – fluids for car, booster cables, survival candle/matches, shovel

**O**CTOBER

Car Kit – non-perishable food (granola bars), warm clothes, maps

#### NOVEMBER

Great Job! You've completed your kits! Now help friends and family learn how they can do theirs!

## DECEMBER

# Feature Hazard: Drought/Low Water Conditions

## Ministry of Community Safety and Correctional Services

https://www.emergencymanagementontario.ca/english/beprepared/ontariohazards/ExtremeHeat/drought.html

# **Facts About Drought/Low Water Conditions**

### What is a drought/low water condition?

The Ministry of Natural Resources defines drought or a period of low water as an extended period of time with one or more of the following:

- Three months or more with below average precipitation; this may be combined with high rates of evaporation.
- Conditions in which the water levels in streams are at the minimum required for the survival of aquatic life. Water must be rationed only for high priority uses since many wells are becoming dry.
- Drought/low water conditions can have socioeconomic impacts that are felt over a much larger area than the individual properties that the drought/low water conditions have been reported at.

# Negative impacts of drought/low water conditions may include:

- Water shortages and conservation measures for households, municipalities, industries, businesses and agriculture
- Increase in wildfires
- Decline in water quality
- · Above average insect infestations and plant disease
- · Impacts on shipping and marine transportation
- Reduced hydro-electric production
- Loss of fish and wildlife habitat
- Loss or damage of crops

# **Ontario Low Water Response Plan**

The Ontario Low Water Response was developed by the Province of Ontario in order to assist in the preparation, co-ordination and to support local response to a drought.

MNR and the Conservation Authorities regularly monitor water level conditions. There are three levels use to describe water levels in regards to drought/low water in Ontario:

Level I: The potential for water supply problems is identified.

Level II: Minor water supply issues are encountered.

Level III: Supply no longer meets demand. Social and economic impacts are experienced.

For more information on Low Water and how it is monitored and reported, visit Quinte Conservation or the Ministry of Natural Resources websites.

http://quinteconservation.ca https://www.ontario.ca/page/low-water-response-program

# **FEATURE HAZARD - Forest Fires**

# **Ministry of Community Safety and Correctional Services**

https://www.emergencymanagementontario.ca/english/beprepared/ontariohazards/forestfires/forestfires.html

Every year, Ontario's fire rangers and local fire departments respond to hundreds of forest fires. While forest fires can be dangerous to people and property, being prepared in advance and knowing what actions to take can better protect you.

When you are building your family emergency plan review and discuss these safety tips with your entire household to make sure everyone understands what to do.

## General Tips

If you are indoors:

- If you are trapped inside your home by a wildfire home, stay inside (unless advised by officials to evacuate) and move away from outside walls. Close doors, but leave them unlocked.
- · Close windows, vents, and blinds. Remove lightweight curtains.
- Open the fireplace damper. Close fireplace screens.
- Turn a light on in each room to increase the visibility of your home in heavy smoke.

If you are advised to evacuate:

- Wear protective clothing and footwear to protect against flying sparks and ashes.
- Tell someone when you leave and where you are going.
- Choose a route away from fire hazards (listen to the radio or television for information)
- Watch for changes in the speed and direction of fire and smoke.

## If you are outdoors:

- Do not try to outrun the blaze. Instead, look for a body of water such as a pond or river to crouch in.
- If there is no water nearby, find a depressed, cleared area with little vegetation.
- If a road is nearby, lie face down along the road cut or in the ditch on the uphill side. Cover yourself with anything that will shield you from the fire's heat (e.g. loose earth).
- Protect your lungs by breathing air closest to the ground, through a moist cloth, if possible, to avoid inhaling smoke.

#### Prepare now:

- Review and discuss the safety tips with your entire household to make sure everyone understands what to do in a forest/wildland fire.
- Clearly mark all driveway entrances and display your address so that fire vehicles can easily find your home.
- Practice evacuating your home. Teach all household members the technique of "stop, drop and roll" in case clothes catch on fire.
- Install smoke detectors and sprinklers on every floor and by all sleeping areas.
- Plan several escape routes away from your home by car and by foot.
- Create a safety zone around your home. Modify or eliminate brush, trees and other vegetation near your home.
- Consult with your local fire department about making your home fireresistant.

# 72-Hour Survival Kit Recipes

# **Energy Trip**

1 can each (16 oz) black beans, garbanzo beans and white chili beans 1/2 cup of cilantro or dried cilantro
1 onion or 1 cup of dried onion
Chili powder to taste
Salt & pepper to taste

#### **Directions**

- 1. Rinse all 3 cans of beans and put in bowl or container.
- 2. Add cilantro, onion, chili powder, salt & pepper.
- 3. Stir and eat within 3 days.

Found at <a href="https://www.emergencykitcookoff.org">www.emergencykitcookoff.org</a> Recipe submitted by Vivian McKemie reprinted with permission

# **Spicy Survival Trail Mix**

1/8 cup sugar
1 tsp kosher salt
1/4i cup honey
3/4 tsp cayenne pepper (add more if desired
1 pounds nuts (any variety)
1-2 cups dried fruit

#### **Directions**

- 1. Combine sugar and salt in a bowl.
- 2. Melt honey and cayenne pepper in a skillet over the grill. Add nuts and stir to coat. Spread nut mixture in a single layer on a greased baking sheet. Bake in gas oven preheated to 350 (or on the grill) for 10-15 minutes, stirring once. Raw nuts will need to be cooked slightly longer.
- 3. Cool slightly and then mix nuts with the sugar/salt mixture.
- 4. Add 1-2 cups dried fruit of your choice. You can also add chocolate chips, if desired.

# Shelter-in-Place

In the event of an emergency, such as the accidental or intentional release of dangerous goods into the atmosphere (e.g., chemical, biological, radiological or nuclear contaminants), persons in the threatened area may be instructed to shelter-in-place.

#### What is Shelter-in-Place?

 Unlike seeking refuge at a shelter outside of your home or place ofwork, as might occur during an evacuation, shelter-in-place is a precaution to help keep you safe by remaining indoors.

#### What should I do if at home?

- If instructed by local officials to shelter-in-place, close and lock all
  windows and exterior doors. If there is danger of an explosion, close all
  window coverings (e.g., shades, blinds, curtains). Also turn off all fans,
  vents, and heating and air conditioning systems and close any fireplace
  dampers.
- If possible, take refuge in a small, interior room, with no or few windows.
   In case of a chemical threat, an above ground location is preferable, as chemicals heavier than air may seep into the basement even with the windows closed.
- Although most shelter-in-place orders usually last only a few hours, take your family emergency survival kit into the room with you so you and your family and pets have a supply of food, bottled water, first aid supplies and medications on hand.
- Have a working radio available so you can listen to the media to know when it's safe to come out or if you will need to evacuate the area.
- Try to have a hard-wired telephone inside the room in which you are seeking shelter. This will provide a backup to any cellular equipmentyou may have.
- Avoid using the telephone unless you are reporting an emergency, or it is absolutely necessary. Emergency responders and those who need immediate emergency assistance will need all available lines.

#### How will I be notified?

- · Typically by the media.
- Alternately, emergency services might drive through your neighbourhood and provide instructions over a loud speaker or by going door-to-door.
- Some municipalities have installed public alerting systems, such as sirens, tone-alert radios, and automated phone calling. Please contact your local emergency management coordinator for information on any such systems in your community.

#### What should I do if advised to shelter while at work?

- Close the business and ask all staff, customers or visitors to stay inside the building.
- Close and lock all doors, windows and any other openings to the outside.
- Turn off, seal or disable all building mechanical systems such as fans, heating and air-conditioning systems, and systems that automatically supply fresh air.
- In cases of a chemical threat try to seek shelter in above ground rooms (e.g., conference rooms, large storage closets, copy or pantry rooms) that will prevent overcrowding and will have access to a hard-wired telephone.
- Avoid rooms with large windows or mechanical equipment like ventilation blowers or pipes, as it might not be possible to seal offthis equipment from the outdoors.
- Write down the names of everyone in the room and call your business's designated emergency contact person to report who is in the room and their affiliation with the business.
- Listen to the media for further instructions from local authorities.

# **Evacuations**

# What should you do if ordered to evacuate?

- □ Offer to assist neighbours who may not be able to evacuate on their own. If possible, make these arrangements in advance
   □ Take your family Ready-to-Go kit. (see details on next page)
   □ Evacuate the area affected by the emergency exactly as directed. Remain calm, do not speed and obey official directions as some roads may be closed or rerouted
- ☐ Don't take shortcuts. Doing so might lead you to a blocked or dangerous area
- □ During some evacuations, you may be asked to report to a reception centre. These may be set up to check people and vehicles for contamination, record evacuee contact information or arrange for temporary housing. Even if you have somewhere else to go in long term evacuations, consider attending the shelter for registration and inquiry purposes
- ☐ Listen to media reports to stay informed about further announcements from your local emergency officials

When arriving at a reception centre operated by Peterborough County Community and Human Services, staff greeting you will be clearly identified as someone who can help you. If you require medical assistance, notify staff immediately.

You and your family will be required to register with your full name and contact information. This will assist in reuniting you with any family members you may have been separated from. You will be issued a photo ID and will be asked to sign in and out if you leave the centre for any reason.

# **Evacuations**

Evacuation and reception centres typically provide food, shelter, clothing, emergency financial assistance and other personal supports. It also acts an agent for family reunification and as a location to obtain information about the emergency. If the emergency requires an overnight stay, cots, blankets and comfort kits may be provided by the Canadian Red Cross.

Peterborough County Community and Human Services also works closely with agencies and volunteer groups throughout the County to provide these services. Peterborough-Prince Edward Public Health, Canadian Red Cross, Salvation Army and many other community groups will also be available to provide valuable support during an emergency.

## **READY TO GO KIT**

- □ Change of clothes
- □ Copies of ID, insurance papers and important documents
- □ Toiletries (toothbrush, toothpaste, soap, hairbrush, deodorant, etc.)
- □ Cash
- □ Spare keys
- □ Extra medication and copies of prescriptions
- □ Copy of important phone numbers (family, work, daycare, vet, etc.)
- □ First Aid kit
- ☐ Flashlight with batteries
- □ Non-perishable snacks and some bottled water or water purification kit

# The Role of Peterborough County in an Emergency

# **Non-Emergency Support and Activities**

Peterborough County supports its member municipalities prior to an emergency by participating with them and supporting them in exercises, training and public education and awareness initiatives. The County is also required to conduct their own training and exercise for the County Control Group as well as developing and delivering public education and awareness information.

# **Emergency Support and Activities**

In the event of a single municipality activating their emergency plan, Peterborough County provides support by sending representation from Peterborough County/City Paramedic Service and as part of municipal emergency plans.

In the event of a large scale, multiple municipal emergency situations, Peterborough County will activate its County Control Group to provide assistance and support by coordinating resources, liaising with provincial and federal partners through the Provincial Emergency Operations Centre (PEOC), non-governmental stakeholders and providing County services to the municipalities as requested, such as paramedic services and emergency social services.

If you would like to request a presentation on personal preparedness or emergency management in Peterborough County, or you have any questions regarding emergency planning in Peterborough County, contact Brent Abell, Superintendent Community Programs and Emergency Management, at:

705-743-5263 Ext 4140 or babell@ptbocounty.ca

# **Family Emergency Plan Template**

Remember: the objective of a family emergency plan is to be prepared to be self-sufficient for a minimum of 72 hours as well as being able to reunite and have a plan in the event of an evacuation.
