

What is a Cubic Yard?

The disposal fee for construction and demolition material, shingles and drywall, concrete and bricks, etc. is based on the load size or volume of material that is brought in. The unit of measurement is a cubic yard.

What is a Cubic Yard? A cubic yard is a volume of space 3 feet square and 3 feet deep (3' x 3' x 3').

Air space and density will be taken into consideration when load size is estimated.

Calculating a cubic yard:
 $L \times W \times D = \text{ft}^3 \div 27 = \text{y}^3$

The following figures are approximate sizes, provided **only as a guide**. The Transfer Station Attendant will determine the volume based on their assessment of the size and density of the load.

Average trailer capacities:

Trailer Size	Capacity	Cubic yards (approximate)
4' x 6' Trailer	1/2 full	0.6
	To top of trailer	1.2
4' x 8' Trailer	1/2 full	0.8
	To top of trailer	1.6
5' x 10' Trailer	1/2 full	1.3
	To top of trailer	2.5

Average pickup truck capacities:

Truck Bed Size	Capacity	Cubic yards (approximate)
4' x 6' Bed	1/2 full	0.6
	To top of bed	1.3
4' x 7' Bed	1/2 full	0.8
	To top of bed	1.5
5' x 7' Bed	1/2 full	1.0
	To top of bed	2.0
5' x 8' Bed	1/2 full	1.1
	To top of bed	2.2
